No negro is allowed to live or do business in Southern Pines. They are all congregated in a place called "Jimtown," and when they visit the town proper, are models of quiet and orderly behavior."

The Observer adds: "Southern Pines is the only town in North Carois the only town in the South settled exclusively by Northerners, and we further have not the slightest doubt that it is the only community in the South in which "no negro is allowed to live or do business". New England, let it not be forgotten, has abused and maligned the white people of the South because the negro was not accepted as the social equal of the white man. It was New England which tried to put former slaves over their masters; it was New England that tried to fasten negro government upon the South by the bayonet; it was New England that produced "Uncle Tom's Cabin," and yet the only community in the cases," and we quite agree with Dr. between the white people of the two Gladman on this point.

THE Peace Commissioners will rival the United States Senate in talking and doing nothing. The United States have said that Spain must release her sovereignty over Caba, and they have also made it clear that Spain must give up the Phillipines. While all this is so, the Commission adjourns from day to day without coming to any settlement. The Spanish commissioners are playing the old Spanish dodge of asking for more time. It was thought that it was settled that Cuba was to be lost to Spain, but now the news comes that the Spanish commissioners consider the question still open. It is time to say to the Spaniards that our terms are so and so, and we advise you to accept, and if you do not accept them, we shall force them on you. This will bring the whole business to a settlement. Spain can then say to her creditors: "We had to release your security by force." It is bester for Spain and for this country to end the business, and be done with
